GitHub: github.com/harishpandu548

Summary

Motivated and detail focused Full Stack Developer and Data Science Graduate with experience in building modern web applications. Strong exposure to artificial intelligence driven systems, secure authentication workflows, and production ready deployments using current web technologies.

Technical Skills

Frontend Technologies: HTML, CSS, JavaScript, TypeScript, React, Nextjs, Redux Toolkit (RTK), Context API, Tailwind CSS, Server-Side Rendering (SSR), Client-Side Rendering(CSR), Responsive UI/UX Design

Backend Technologies: Nodejs, Express, REST interfaces, API integration, Multi-Tenant Architecture, authentication workflows, Socket.IO, session management, OAuth (Google, GitHub, Facebook)

Databases and Platforms: MongoDB, PostgreSQL, Prisma, Mongoose, Cloudinary, Vercel, Render

Payments and AI Integrations: Razorpay payment integration, webhook handling, Gemini AI API Integration

Development Tools: Git, GitHub, Postman, Thunder Client, Axios, environment configuration

Programming Languages: Python, Java, data structures and algorithms

Projects

CreatorOS – Multi-Tenant Creator Platform

Next.js, TypeScript, Prisma, PostgreSQL, NextAuth, Gemini AI, Razorpay, Socket.io, Redux Tool Kit

Github Link: github.com/harishpandu548/creatorOS

- Architected CreatorOS as a multi-tenant platform, enabling multiple independent creator workspaces to operate on a shared system with strict data isolation and access boundaries.
- Designed a creator-context-based authorization layer, where every backend request is evaluated against the active creator, user role, subscription state, and usage constraints.
- Implemented centralized backend APIs and global frontend state management to maintain consistent creator context, subscription status, and usage tracking across the entire platform.

Artificial Intelligence Software as a Service Platform

Nextjs, TypeScript, Prisma, PostgreSQL, NextAuth, Razorpay, Vercel

Project Link: ai-saas-application-gamma.vercel.app

- Designed and developed an artificial intelligence software as a service platform offering chat assistance, content generation, and document summarization tools and many more(10+ AI tools).
- Implemented secure user authentication, controlled user access, and a usage credit system.
- Built multiple tools including an AI chat assistant, blog generator, email writer, and PDF summarizer.

Authentication Profile Application – (Nextjs, MongoDB, Mongoose, NextAuth, Cloudinary)

Project Link: project2-tau-olive.vercel.app

- Developed a web application supporting user registration, login, logout, and profile management features.
- Ensured secure session handling and validation for protected routes.

YouTube Clone Application – (React, Nodejs, Express, MongoDB, Mongoose, Cloudinary, Tailwind CSS)

Project Link: clonetube-frontend.vercel.app

- Built a video sharing application with features including uploads, likes, comments, subscriptions, and watch history. Managed user interactions such as likes and comments using backend APIs.
- Implemented API based video listing and dynamic video playback.

Blog Application – (React, Appwrite, Cloudinary, Tailwind CSS)

Project Link: appwrite-megablog-weld.vercel.app

- Created a blogging platform supporting post creation, editing, and deletion with secure authentication.

Certifications

AI for Beginners - HP LIFE | Data Science & Analytics - HP LIFE | Introduction to Cybersecurity Awareness | Wadhvani Foundation Certificate | Internship common aptitude test – LabMentix

Education

Bachelor of Technology in Data Science

2022 to 2025

Malla Reddy College of Engineering and Technology, Hyderabad
